◆ Summary

Senior Software Engineer and Enterprise AI Engineer with 15+ years of experience designing and delivering enterprise commerce platforms, backend systems, integrations, APIs, and cloud solutions for organizations including JEGS Automotive, Costco, T-Mobile, Caterpillar, and Kroger.

Deep expertise in Java, HCL Commerce, enterprise architecture, system integration, and production engineering, complemented by hands-on experience building modern AI solutions using RAG, LangGraph, MCP-connected tools, vector databases, local and cloud LLMs, model routing and fallback, and AWS Bedrock AgentCore. Combines proven enterprise engineering experience with modern AI capabilities to build scalable, reliable systems that solve complex business and operational challenges.

◆ Core Competencies

- HCL Commerce / IBM WebSphere Commerce
- Java & Enterprise Application Development
- Enterprise Commerce Architecture
- API Design & System Integration
- Microservices & Event-Driven Architecture
- Cloud & Enterprise Integrations
- Enterprise AI & Agentic AI
- Retrieval-Augmented Generation (RAG)
- LangChain & LangGraph
- MCP (Model Context Protocol)
- Vector Databases & Embeddings
- LLM Integration, Routing & Fallback
- AWS Bedrock & AgentCore

◆ Technical Skills

Enterprise Commerce: HCL Commerce / IBM WebSphere Commerce, Commerce Architecture, Order Management, Checkout, Catalog, Pricing, Promotions, Payment Integrations

Languages & Backend: Java, Python, Spring Boot, FastAPI, REST APIs, Microservices

AI & Agentic AI: RAG, LangChain, LangGraph, MCP, Tool Calling, Prompt Engineering, Local & Cloud LLMs, Model Routing & Fallback

Vector Search & Retrieval: Qdrant, Vector Databases, HuggingFace Embeddings, Semantic Retrieval

Cloud & DevOps: AWS, AWS Bedrock, Bedrock AgentCore, Docker, CloudWatch

Frontend: React, JavaScript, HTML, CSS

◆ Professional Experience

JEGS Automotive Inc.

January 2021 - Present

Senior Software Engineer | Enterprise AI Engineer

- Architected PCI-DSS compliant payment gateway modernization integrating Stripe, Apple Pay, Google Pay, PayPal, and Affirm.
- Integrated Bloomreach Search and Bloomreach BrXM to enhance product discovery, search, and enterprise content management.
- Architected automated catalog propagation pipelines from PDM through production environments.
- Designed API Gateway solutions and Azure DevOps CI/CD deployment pipelines.
- Architected Kount360 fraud prevention and real-time transaction risk analysis solutions.
- Led Cloudflare migration to improve platform performance, reliability, and global delivery.
- Optimized HCL Commerce platform performance through JVM tuning, application analysis, and HCL Health Center.
- Implemented GA4, Listrak, and customer analytics integrations.

- Designed and delivered AI engineering solutions using RAG, LangChain, LangGraph orchestration, and MCP-connected tools.
- Built a Commerce AI Diagnosis Platform for root-cause analysis across catalog, inventory, and pricing domains.
- Developed a Technical Knowledge Retrieval Platform using FastAPI, Qdrant, HuggingFace Embeddings, and local/cloud LLM fallback mechanisms.
- Designed AWS Bedrock AgentCore deployment architecture for the Commerce AI Diagnosis Platform.
- Designed enterprise AI architecture patterns incorporating retrieval workflows, tool integrations, model routing, and fallback mechanisms.

Rudra Technologies / SeerTek Systems

June 2018 - December 2020

IBM WebSphere Commerce Lead & WCS Developer

Clients: Costco Wholesale, T-Mobile, Tailored Brands

- Architected Member Pharmacy Program integrations for Costco using RESTful services.
- Built Customer Service Portal using React, Redux and IBM WebSphere Commerce.
- Led B2B mobile upgrade automation initiatives for T-Mobile.
- Implemented SIM-in-Hand auto-activation and commerce integrations.
- Built reusable React component libraries and production support tooling.
- Monitored and supported enterprise platforms using Kibana, UC4 and AppDynamics.

Earlier Career

November 2009 - March 2018

IBM WCS Tech Lead, Lead Engineer & Developer

Clients: Caterpillar, Kroger, Dunelm, Bemol Brazil, Maui Jim, Yamaha, Sussan, Wolters Kluwer and others.

- Delivered enterprise commerce architecture and implementation projects across multiple international clients.
- Led IBM WCS migrations, REST integrations and SAP ECC integrations.
- Implemented geolocation, search, promotions and storefront capabilities.
- Led offshore development teams and authored architecture and design documentation.
- Delivered production support and enterprise commerce modernization initiatives.

◆ Selected AI Engineering Projects

Technical Knowledge Retrieval Platform:

Built an Enterprise RAG platform using FastAPI, HuggingFace Embeddings, ChromaDB and Local & Cloud LLM fallback architecture. The solution ingests technical HTML articles, performs semantic retrieval and generates grounded answers for technical support use cases. Improves access to technical knowledge through grounded retrieval and context-aware answer generation.

Technologies: FastAPI, LangChain, RAG, Qdrant, HuggingFace Embeddings, Local LLMs, Cloud LLMs

Commerce AI Diagnosis Platform:

Designed and implemented a LangGraph-based enterprise diagnosis platform integrating MCP-connected tools, diagnosis workflows, root-cause analysis and executive summary generation. The platform automates root-cause analysis across catalog, inventory and pricing domains, designed to support structured root-cause investigation across catalog, inventory, and pricing domains.

Technologies: LangGraph, MCP, FastAPI, Tool Calling, Enterprise AI

Commerce Diagnosis Deployment on AWS Bedrock AgentCore:

Deployed the Commerce AI Diagnosis Platform on AWS Bedrock AgentCore using containerized runtime architecture, IAM security, CloudWatch observability and enterprise deployment patterns. The architecture provides a scalable foundation for enterprise AI orchestration, observability and secure cloud-native runtime execution.

Technologies: AWS Bedrock AgentCore, Docker, CloudWatch, LangGraph, MCP

◆ Education

Bachelor of Technology (Computer Science Engineering)

JNTU Hyderabad, India

Post Graduate Program - Cloud Computing

Great Learning

September 2004 – June 2008
