📌 Summary

Senior Software Engineer with 15+ years of experience delivering enterprise commerce, cloud and integration solutions for organizations including JEGS Automotive, Costco, T-Mobile, Caterpillar and Kroger.

Designed and implemented enterprise AI solutions using RAG, LangGraph orchestration, MCP-connected tools, Vector Databases, Local & Cloud LLMs, Model Routing & Fallback and AWS Bedrock AgentCore. Proven expertise in enterprise architecture, scalable platform engineering and AI-driven automation for solving complex business and operational challenges.

📌 Core Competencies

- Enterprise AI & Agentic AI
 - Retrieval-Augmented Generation (RAG)
 - LangChain & LangGraph
 - MCP (Model Context Protocol)
 - Enterprise Fallback Architectures
 - AWS Bedrock AgentCore
 - Vector Databases & Embeddings
 - FastAPI & Python
 - Enterprise AI Architecture Patterns
 - Cloud Integrations
 - API Design & Integration
 - Microservices & Event-Driven Systems
 - AWS
 - HCL Commerce Architecture
-

📌 Technical Skills

AI & Agentic AI: RAG, LangChain, LangGraph, MCP, ChromaDB, Vector Databases, HuggingFace Embeddings, FastAPI, Local & Cloud LLMs, Enterprise Fallback Architectures, AWS Bedrock AgentCore, Prompt Engineering, Tool Calling

Cloud & Enterprise Technologies: AWS, Docker, CloudWatch, Java, Python, React, Spring Boot, REST APIs, HCL Commerce

📌 Professional Experience

JEGS Automotive Inc.

January 2021 - Present

Senior Solution Architect | Enterprise AI Engineer

- Designed and delivered AI engineering solutions using RAG, LangChain, LangGraph orchestration and MCP-connected tools.
- Built a Commerce AI Diagnosis Platform for root-cause analysis across catalog, inventory and pricing domains.
- Developed an technical knowledge retrieval platform using FastAPI, ChromaDB, HuggingFace Embeddings and Local & Cloud LLM fallback mechanisms.
- Designed an AWS Bedrock AgentCore deployment architecture for the Commerce AI Diagnosis Platform.
- Designed enterprise AI architecture patterns incorporating retrieval workflows, tool integrations, fallback mechanisms.
- Architected PCI-DSS compliant payment gateway modernization including Stripe, Apple Pay, Google Pay, PayPal and Affirm.
- Designed API Gateway solutions and Azure DevOps CI/CD deployment pipelines.
- Integrated Bloomreach Search and Bloomreach BrXM for AI-powered search and content management.
- Architected automated catalog propagation pipelines from PDM to Production environments.
- Led Cloudflare migration improving global performance and reliability.

- Implemented GA4, Listrak and customer analytics integrations.
- Optimized platform performance using HCL Health Center and JVM tuning.
- Architected Kount360 fraud prevention and real-time transaction risk analysis solutions.

Rudra Technologies / SeerTek Systems

June 2018 - December 2020

IBM WebSphere Commerce Lead & WCS Developer

Clients: Costco Wholesale, T-Mobile, Tailored Brands

- Architected Member Pharmacy Program integrations for Costco using RESTful services.
- Built Customer Service Portal using React, Redux and IBM WebSphere Commerce.
- Led B2B mobile upgrade automation initiatives for T-Mobile.
- Implemented SIM-in-Hand auto-activation and commerce integrations.
- Built reusable React component libraries and production support tooling.
- Monitored and supported enterprise platforms using Kibana, UC4 and AppDynamics.

Earlier Career

November 2009 - March 2018

IBM WCS Tech Lead, Lead Engineer & Developer

Clients: Caterpillar, Kroger, Dunelm, Bemol Brazil, Maui Jim, Yamaha, Sussan, Wolters Kluwer and others.

- Delivered enterprise commerce architecture and implementation projects across multiple international clients.
- Led IBM WCS migrations, REST integrations and SAP ECC integrations.
- Implemented geolocation, search, promotions and storefront capabilities.
- Led offshore development teams and authored architecture and design documentation.
- Delivered production support and enterprise commerce modernization initiatives.

Selected AI Engineering Projects

Technical Knowledge Retrieval Platform

Built an Enterprise RAG platform using FastAPI, HuggingFace Embeddings, ChromaDB and Local & Cloud LLM fallback architecture. The solution ingests technical HTML articles, performs semantic retrieval and generates grounded answers for technical support use cases. Improves access to technical knowledge through grounded retrieval and context-aware answer generation.

Technologies: FastAPI, LangChain, RAG, ChromaDB, HuggingFace Embeddings, Local LLMs, Cloud LLMs

Commerce AI Diagnosis Platform

Designed and implemented a LangGraph-based enterprise diagnosis platform integrating MCP-connected tools, diagnosis workflows, root-cause analysis and executive summary generation. The platform automates root-cause analysis across catalog, inventory and pricing domains, designed to support structured root-cause investigation across catalog, inventory, and pricing domains.

Technologies: LangGraph, MCP, FastAPI, Tool Calling, Enterprise AI

Commerce Diagnosis Deployment on AWS Bedrock AgentCore

Deployed the Commerce AI Diagnosis Platform on AWS Bedrock AgentCore using containerized runtime architecture, IAM security, CloudWatch observability and enterprise deployment patterns. The architecture provides a scalable foundation for enterprise AI orchestration, observability and secure cloud-native runtime execution.

Technologies: AWS Bedrock AgentCore, Docker, CloudWatch, LangGraph, MCP

Education

Bachelor of Technology (Computer Science Engineering)

September 2004 – June 2008

JNTU Hyderabad, India

Post Graduate Program - Cloud Computing

Great Learning
